AUDIO / VIDEO REQUIREMENTS

Dr. Kevin suggests the following to help you make your event the best ever for your attendees.

Computer, Projector and Screen:

- Dr. Kevin uses a MacBook Pro with USB-C to HDMI for video output (Dr. Kevin will bring his own USB-C to HDMI adapter and wireless clicker). Dr. Kevin's entire presentation is presented from his computer using Keynote software with a 16:9 display ratio.

- A/V projector with a minimum of 1500 lumens and screen.

- Largest Projection Screen possible. (For audiences greater than 400 people, IMAG (Image Magnification) is highly recommended.)

- If recording or using IMAG, please ensure an "ISO" recording of the stage.

Microphone and Audio:

- Dr. Kevin requires a wireless lavaliere microphone connected to a high-quality audio system. Please run sound through an AUX cable, not HDMI. Dr. Kevin may control the volume via his wireless clicker which is only possible if the sound runs from his laptop using an AUX cable.

- Two (2) wireless microphones with runners

- Speakers/audio should be very high-quality and sufficient for the entire audience to hear any sound/video clips played directly from Dr. Kevin's laptop.

- Please make sure the sound system is functioning and tested before his arrival.

Stage:

- If there is a podium, please position it to one side of the stage.

- Dr. Kevin prefers to have his MacBook on the podium on stage (if this doesn't interfere with the presenter before him) or on a small round high-top table. HDMI cable, AUX cable, and power outlet should run to the computer. If it is preferable to have the A/V team run the presentation from the back of house, that is also fine.

- Please have three (3) bottles of water or cups of water available to Dr. Kevin while on stage.

Lighting:

- Stage lights are encouraged. The venue should be dark so that the projected keynote is vivid on the screens.

Power & Connection

- APC UPS, 600VA UPS Battery Backup & Surge Protector
- APC Smart Plug Wifi Power Strip with USB Ports
- HDMI USB 3.0 Video Capture, 1080p@60fps Grabber (Type-C/USB 3.0 Capture)
- Hardwired Internet

Camera

- Canon XC15 4K Professional Camcorder

Sound

- Video Microphone - Unidirectional On-Camera Microphone for DSLR Cameras
- Saramonic Wireless VHF Lavalier Microphone Bundle with 2 Bodypack Transmitters, 2 Receivers, and 2-Ch Mixer for DSLR Cameras

Lighting

- FOSITAN FL-3060 2nd Gen Portable Rollable 30x60cm Flexible LED Light Panel Mat on Fabric Daylight 5000K 48W 8000LM 384 SMD LED 90 CRI+
- Emart Photography Umbrellas Continuous Lighting Kit, 400W 5500K

Background Display Options

- YISITONG Photography Background Support Stand 6.2 ft. Wide Cross Bar 6.5 ft. Tall Adjustable Portable Photo Backdrop Crossbar
